nonprovisional	NO	\$1510	\$300	.\$0	\$1810	02/20/2009

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE

Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

or Fax (571)-273-2885

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 781 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 781 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert McDermott on 6 November 2008.

The application has been amended as follows:

1. (Currently amended) A method of coding at least part of an audio signal with an audio encoder in order to obtain an encoded signal, the method comprising the steps of:

predictive coding the at least part of the audio signal <u>in the audio coder</u> in order to obtain prediction coefficients which represent temporal properties, such as a temporal envelope, of the at least part of the audio signal;

transforming the prediction coefficients into a set of times representing the prediction coefficients; and

including the set of times in the encoded signal, wherein:

Art Unit: 2626

the at least part of an audio signal is segmented in at least a first frame and a second frame the first frame and the second frame have an overlap including at least one time of each frame, and

for a pair of times consisting of one time of the first frame in the overlap and one time of the second frame in the overlap, a derived time is included in the encoded signal, which derived time is a weighted average of the one time of the first frame and the one time of the second frame.

- 2. (Currently amended) A-method as claimed in The method of claim 1, wherein the predictive coding is performed by a using a filter and wherein the prediction coefficients are filter coefficients.
- 3. (Currently amended) A-method as claimed in The method of claim 1, wherein the predictive coding is a linear predictive coding.
- 4. (Currently amended) A method as claimed in The method of claim 1, wherein prior to the predictive coding step a time domain to frequency domain transform is performed on the at least part of an audio signal in order to obtain a frequency domain signal, and wherein the predictive coding step is performed on the frequency domain signal rather than on the at least part of an audio signal.

Application/Control Number: 10/520,876

Art Unit: 2626

5. (Currently amended) A method as claimed in The method of claim 1, wherein the times are time domain derivatives or equivalents of line spectral frequencies.

Page 4

10. (Currently amended) A method of coding at least part of an audio signal with an audio encoder in order to obtain an encoded signal, the method comprising:

predictive coding the at least part of the audio signal in the audio coder in order to obtain prediction coefficients that represent temporal properties of the at least part of the audio signal;

transforming the prediction coefficients into a set of times representing the prediction coefficients; and

including the set of times in the encoded signal, wherein the at least part of an audio signal includes at least a first frame and a second frame, the first frame and the second frame having an overlap including at least one time of each frame, and

a given time of the second frame is differentially encoded with respect to a time in the first frame.

21. (currently amended) A method of decoding an encoded signal representing at least part of an audio signal with an audio decoder, the encoded signal including a set of times representing prediction coefficients that represent temporal properties of the at least part of the audio signal, the method comprising:

deriving the temporal properties from the set of times,

using the temporal properties <u>in the audio decoder</u> to obtain a decoded signal from the encoded signal, and

Page 5

providing the decoded signal,

wherein:

the times are related to at least a first frame and a second frame in the at least part of an audio signal,

the first frame and the second frame have an overlap that includes at least one time of each frame,

the encoded signal includes at least one derived time that is a weighted average of a pair of times consisting of one time of the first frame in the overlap and one time of the second frame in the overlap, and wherein

the method includes using the at least one derived time in decoding the first frame and in decoding the second frame.

Allowable Subject Matter

Claims 1-5, 8-13, 16-25, and 27-36 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 16, 21, and 23, Kumaresan et al. do not disclose or suggest including a derived time in the encoded signal, the derived time being a weighted average of a one time of a first frame and a one time of a second frame.

Regarding claims 10 and 32, Kumaresan et al. do not disclose or suggest differentially encoding a given time of a second frame with respect to a time in a first frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN L. ALBERTALLI whose telephone number is (571)272-7616. The examiner can normally be reached on Monday-Thursday, 8 AM to 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on (571) 272-7843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
